

Changing the Default Username and Password (HS3)

How-to change the default username and password in HS3.

The default username is: *default* and the default password is: *default*. We highly recommend that you change the username and password to something more secure. Make sure to save this information.

1. Open the **TOOLS** drop menu and click **Setup**.
2. Click the **Network** tab.
3. In the User Settings section, enter a username and password and then select user rights.
4. Click **Add User**.
