

# Design Guidelines

The following pages document the various design styles used throughout the HomeSeer platform.

## Device Layouts

This article describes the different device layouts and how they are determined.

## JUI

This article covers the user experience aspects of the JUI API components, the members within the [HomeSeer.Jui Namespace](#), such as how they are displayed on different clients and the kind of design patterns that are recommended to optimize usability.

## Colors

This article covers the colors used throughout the HomeSeer system.

## Product Image Guidelines

Shop Images

All product images for HS4 plugins should be created using the following steps:

1. **Download** the following 500 x 500 px templates for use with paid and free plugins
