

# Connecting with HSTouch through MyHS

Instructions on connecting to your system via HSTouch through MyHS.

## Configuring HSTouch Mobile App with MyHS

### Note

Unless you have [HSTouch Designer](#) and have created a custom interface, you will want to use our new app, [HomeSeer Mobile](#) instead.

## On Android

1. Download and install the HSTouch mobile app from the Google Play store.
2. Launch HS3Touch and choose **Settings** from the three dot ( ) menu.
3. Tap **MyHS** and enter your MyHS username and password.
4. Launch HS3Touch and choose **MyHS** if prompted to select a connection method.

## On iOS

1. Download and install the HS3Touch mobile app from the Apple App store.
2. Access the Settings app in your device and open the HS3Touch settings.
3. Tap **MyHS**, then enter your username and password.
4. Launch HS3Touch and choose **MyHS** if prompted to select a connection method.
