

# Exporting a Dashboard

This article will show you how to export a dashboard to HomeSeer Mobile.

## Editing

We do not recommend editing the JSON data as this may break the import or result in missing data on your dashboard.

## On Android:

*Requires version 1.1.13*

While in the Dashboard section of the app, tap the three-dot menu in the top right corner of the screen. You will see a menu appear, select **Import/Export Dashboard**. You will then be presented with JSON data. Click **Copy to Clipboard** to save the data.

We recommend you save this text in a note, email, or other means of saving text.

## On iOS:

*Requires version 1.1.13*

While in the Dashboard section of the app, tap the three-dot menu in the top right corner of the screen. You will see a menu appear, select **Import/Export Dashboard**. You will then be presented with JSON data. Click **Copy JSON** to save the data.

We recommend you save this text in a note, email, or other means of saving text.
