

Android Change Log

Android release notes for HomeSeer Mobile.

v1.1.13 Release Notes

Published 13 Apr 2022

- Add an import/export dashboard feature. This feature allows you to generate JSON for an existing dashboard so you can copy its configuration to an empty dashboard.
 1. Go to the dashboard you want to copy
 2. Open the import/export dashboard page
 3. Copy the JSON
 4. Go to an empty dashboard
 5. Open the import/export dashboard page
 6. Paste the JSON into the available text box
 7. Press the import button
- Remove Firebase analytics. The application size should be significantly reduced.

v1.1.12 Release Notes

Published 15 Oct 2020

Changes

- Fix an identification issue with thermostats created using the HS4 Ecobee plugin

v1.1.11 Release Notes

Published 12 Aug 2020

Changes

- Fix a crash on the device list when displaying a certain media device
- Set version for iOS and Android to match at v1.1.11

v1.1.3 Release Notes

Published 01 Jul 2020

Changes

- Update device type identification for HS4 types
- Replace text referencing "HS3" with "HomeSeer"

v1.1.2 Release Notes

Published 6/5/20

Changes

- Fix remote connections to plugin and recording pages
- Manage events through the "Manage Events" menu action on the Events page

- Other minor updates

v1.1.1 Release Notes

Published 2/21/20

Changes

- [HSM-786] - View camera recordings page for HS4 systems
- [HSM-787] - Manage plugins page for HS4 systems
- [HSM-788] - Update brand colors used in app

Bugs Fixed

- [HSM-803] - Selecting a color from the picker crashes Android app

v1.1.0 Release Notes

Published 8/12/19

Changes

- [HSM-755] - New HomeSeer Camera Inclusion Process Guide

Bugs Fixed

- [HSM-587] - HTTPS communication via IP over LAN is not allowed
- [HSM-381] - Unexpected network error while trying to login
 - Error message content has been expanded on to provide more context about the specifics of the network issues.
- [HSM-233] - System version compatibility checks interrupt use

Bugs Fixed

- [HSM-496] Some Dashboard locations are still unavailable after moving a widget out of that spot
- [HSM-388] Landscape orientation is not yet supported on the camera details page
- [HSM-387] Scrolling while dragging to move a widget is not yet supported

v1.0.6 Release Notes

Published 4/9/19

Changes

- [HSM-697] Automatically navigate to the device list when connecting to a session that has no widgets
- [HSM-699] - Back button no longer immediately closes the app on the main page

Bugs Fixed

- [HSM-495] Plugin devices missing in HomeSeer Mobile but showing up in HSTouch
 - A new plug-in developer document was published that outlines the recommended way to configure devices so they show up in HomeSeer Mobile
- [HSM-541] Application will sometimes crash when switching tabs
- [HSM-626] Dashboard tab is always selected after switching systems
- [HSM-652] Login page logo vector data causes some Lollipop devices to crash

Known Issues

- [HSM-381] Unexpected network error while trying to login
 - More details will now be available on error messages to aid troubleshooting
- [HSM-387] Scrolling while dragging to move a widget is not yet supported
- [HSM-388] Landscape orientation is not yet supported on the camera details page

v1.0.5 Release Notes

Published 2/25/19

Bugs Fixed:

- [HSM-643] - App crashes when resuming from a background state when the last page is not the main activity

Known Issues:

- [HSM-381] Unexpected network error while trying to login
- [HSM-387] Scrolling while dragging to move a widget is not yet supported
- [HSM-388] Landscape orientation is not yet supported on the camera details page
- [HSM-495] Plugin devices missing in HomeSeer Mobile but showing up in HSTouch

v1.0.4 Release Notes

Published 2/18/19

Changes:

- [HSM-489] - Register with MyHS button added to Login page
